Introduction

The [Arab Section of AOAC INTERNATIONAL](#) in partnership with the Global Food Regulatory Science Society ([GFORSS](#)), [AOAC INTERNATIONAL](#), the Arab Industrial Development, Standardization & Mining Organization ([AIDSMO](#)), the GCC Standardization Organization ([GSO](#)) and the [Dubai Municipality](#) is organizing its 1st Annual Meeting at the World Trade Center, Dubai, United Arab Emirates (UAE). The Meeting will be conducted in a hybrid format, coordinating both physical and virtual platforms.

The 1st Annual Meeting is an integral part of the 16th Dubai International Food Safety Conference (DIFSC). Support to the organization of this event is offered by Public and Private Sponsors. The Meeting is open to all stakeholders working in areas related to Food Analytical Sciences and is free of charge for participants joining virtually. Participation in person is managed through the registration system of the Dubai International Food Safety Conference.

The creation of the Arab Section was approved by the Board of Directors of AOAC INTERNATIONAL on March 2022. This 19th regional section aims to strengthen the contribution of Arab Countries in food conformity assessment activities, through active participation in the development, validation, and harmonization of standard analytical methods.

The 1st Annual Meeting will witness the official launch of the section, with the aim to promote networking within the analytical science community, by bringing together scientists from government, industry, and academia to establish standard methods of analysis that ensure the safety and integrity of foods and other products that impact the public health and trade agenda in the Arab Region.
